About me

- **Frontend-focused Fullstack Developer with 2+ years of experience building dynamic, user-centric web applications.** Currently pursuing a college degree in **Information Systems Engineering.**

- **Fullstack** 1.5 years bootcamp course graduated.

- Developed multiple frontend and backend projects independently and collaboratively, leveraging both established and emerging technologies to tackle challenges and demonstrate adaptability.

- **Self taugth** and **fast learner** student who loves innovating and team-working.

Experience & Projects

- **Ordenar Online E-commerce frontend and backend.**
  Responsibilities:
  Built a responsive and user-friendly interface using ReactJS and TailwindCSS, ensuring optimal performance and accessibility.

  Designed and developed a robust REST API using NodeJS and ExpressJS to handle business logic, user authentication, and data retrieval.

  Integrated a MySQL database to store and manage product inventory, user data, and transaction records efficiently.

  Implemented secure login and registration functionality with JWT (JSON Web Tokens) for authentication.

  Key Results:
  Achieved fast loading through frontend and backend optimization techniques.
  Achieved 100% accuracy in handling complex product filtering and sorting queries.

- **Grupo Keluar & Valdemarín Landing Page**
  Responsibilities
  Designed and developed a modern landing pages with JavaScript, Astro, Tailwind and SASS, improving SEO for both companies.

  Collaborated with a graphic designer and backend developer to optimize team workflows.
  Implemented Google Analytics and integrated mailing services to enhance customer outreach.

  Key Results:
  Successfully rebranded the company's online presence, leading to a increase in client inquiries.

Skills
